

Ballenpresse PVG

Technische Daten

Höchstdruck:	30 Tonen	Ballengewicht:	ca. 400 kg
Presskraft:	3.75 kg/cm ²	Stromanschluss:	400V / 7,5 kW
Ballengröße:	1000x800x1200 mm		
Hydraulische Klappe			

**DIXI-
PVG LP 20 + 30**
These horizontal presses
will swallow the most awkward
materials without a hiccup

The very large compaction compartments of these horizontal presses allow them to "swallow" large amounts of very awkward material without any trouble. In this case the press is filled through two lids mounted on the compaction compartment. The compaction takes place automatically when a button is pressed. The bale can be tied either with plastic tape off the roll or wire with looped ends. The tied bale is fully ejected through the hydraulically operated outlet door at the end.

The following are standard features

- Hydraulic opening of outlet door
- Automatic return stroke and shutoff at end of stroke
- Tying system can be varied to adapt it to the particular problem
- Tying with wire from the roll or wire with ready-looped ends, or alternatively with plastic tape from the roll
- Crosswise tying is possible (with additional equipment)
- Bale is fully ejected at Europallet height
- Modern energy-saving design

Special extras:
Crosswise tying system, hydraulic lids combined with guard grille, tipper attachment.

Technical Data

	LP 20	LP 30
Pressure	20 t	30 t
Size of compartment	83 x 32 x 32"	102 x 39 x 32"
Size of inlet opening	63 x 32"	71 x 39"
Approx. bale size	32 x 32 x 20 - 51"	39 x 32 x 20 - 51"
Approx. bale weight	60 - 350 kg	80 - 500 kg
Motor power rating	5.5 kW, 380 V, 50 Hz	7.5 kW, 380 V, 50 Hz

We reserve the right to make technical modifications without prior notice.
